

Wrong-Number Investigation — 0330 088 1135 and 0161 826 1620

Question: Does either Prima Insurance Brokers phone number appear anywhere publicly in connection with Hello Prima / Prima car insurance?

Date of investigation: 2 July 2026. **Primary detail:** `agent_reports/agent1b_number_searches.md` (findings NUM-01–NUM-18), supported by TP-20, DIR-11, SOC-09, WB-07, AGG-12, SE-07, AI-15, DIR-12.

Verdicts

0330 088 1135 (broker main line)

Direct attribution to Hello Prima: NOT CONFIRMED. No public page was found that publishes, suggests or repeats 0330 088 1135 as a Hello Prima / Prima car insurance number. Every indexed occurrence belongs to the broker family (`primainsurance.co.uk`; directory entries for "Prima Insurance Brokers" / "Prima Protect Insurance Brokers", Bury New Road, Prestwich).

0161 826 1620 (broker complaints/privacy line)

Direct attribution to Hello Prima: NOT CONFIRMED. Only substantive indexed sources: the broker's own terms page (published as the complaints/privacy line of Prima Financial Services Ltd) and broker directory entries (Feefo, BIBA, yably, Cylex). Zero results for every Hello Prima combination.

Critical qualification — exposure and machine attribution ARE confirmed

The "not confirmed" verdicts above concern *static publication of a wrong association*. Three related phenomena **were** confirmed and captured:

1. **SERP exposure (Category I/A-exposure):** the broker's numbers are the only phone numbers rendered on the results page for insurer-intent searches — #1 for "prima insurance phone number" on DuckDuckGo and Bing with 0330 088 1135 in the snippet (SE-01/SE-02), 0161 826 1620 in the snippet for complaints queries (SE-04, AI-06), and visible even for "hello prima contact number"-type queries (SE-03, AI-04).
 2. **Machine-generated wrong attribution (live demonstrations):** an AI search summary attributed "0330 088 1135 ... Prima House, 21 Bury New Road, Prestwich" **to `helloprima.co.uk`** (SE-07); another asserted the 0330 number "is indeed associated with Hello Prima's car insurance" (DIR-12); a controlled test produced "Main Customer Service Number: 0330 088 1135 ... These are the official Prima car insurance contact numbers for the UK" (AI-15). Bing's AI answer box cites the broker's contact page as a source about the motor insurer (AI-03). These are transient, machine-generated outputs — captured verbatim with screenshots — not static pages.
 3. **Google Maps asymmetry:** two listings both named "Prima Insurance"; only the broker's shows a number (+44 330 088 1135); Hello Prima's shows none (REV-01/02, AI-07–09).

Sources checked

Search engines (NUM-01–NUM-11; SE-01–SE-16)

All 12 number-permutation queries from the brief ("0330 088 1135"/"03300881135"/ "0161 826 1620"/"01618261620" × "Prima"/"Hello Prima"/"HelloPrima"/"car insurance") run on the Google index (via WebSearch), DuckDuckGo UK and Bing UK. - DuckDuckGo returned **explicit zero-result pages** (screenshotted) for every number+"Hello Prima"/"HelloPrima" combination (NUM-08). - Bing had no exact match for any combination (fallback behaviour documented). - Google-index queries for "<number>" "Hello Prima" return **no page containing both** — but interleave both firms' contact pages in the results (NUM-10). - Google Search itself was CAPTCHA-blocked (block page preserved); the Google *index* was reached via the WebSearch API layer.

All positive occurrences found, 0330 088 1135: primainsurance.co.uk (contact/home/ about), bizseek.co.uk, yelp.com ("Prima Protect Insurance Brokers"), mpostcode.co.uk, vymaps.com (dead listing, "Prima Protect"), Manchester Business Hub ("Prima Insurance", DIR-07). All broker-side. None mentions car insurance or Hello Prima.

All positive occurrences found, 0161 826 1620: primainsurance.co.uk/terms-conditions (complaints/privacy), yably.co.uk, cylex-uk.co.uk, find-open.co.uk, feefo.com (Prima Insurance Brokers, REV-11), biba.org.uk. All broker-side.

Aggregator domains (AGG-12; NUM-16)

site:/on-domain searches of gocompare.com, comparethemarket.com, confused.com, moneysupermarket.com, quotezone.co.uk, uswitch.com, money.co.uk, which.co.uk, defaqto.com: **no page on any aggregator domain associates either number with Prima/Hello Prima** — indeed no aggregator page shows any Prima contact details at all.

Trustpilot (TP-20)

950 unique reviews of helloprima.co.uk (all 334 indexed 1★, all 73 English 2★, 543 keyword-surfaced 3–5★) plus all business replies machine-searched: **zero occurrences** of either number, the broker's email/domain/address, or "wrong/different/another Prima". Hello Prima's replies consistently give 020 3318 9745 / help@helloprima.co.uk.

Directories and reverse-phone databases (DIR-01–DIR-15)

- shouldianswer.co.uk, whocallsme.com: **zero user reports** for both numbers (screenshotted).
- tellows.co.uk, who-called.co.uk, unknownphone.com, whosringing.co.uk: bot-blocked, but Wayback CDX shows no captures for either number and no search-index snippet ties either number to any user report — consistent with no reports existing.
- Yell, 192.com, Cylex, Scoot-type directories: numbers tied to the broker only. 192.com holds correct, separate records for both firms (broker 0161 826 1620; insurer 020 3318 9745) — though both sit in the same "Insurance Brokers" category.
- FCA Register: 0161 826 1620 is the broker's registered contact; the insurer's is +44 20 3318 9745. The 0330 number appears on neither register entry.

Social platforms (SOC-09)

No page on Facebook, LinkedIn, X/Twitter, TikTok, Instagram or YouTube associates either number with Hello Prima. The only social pages carrying the numbers are the broker's own (correct association).

Historical record (WB-07)

Every downloaded Wayback snapshot of helloprima.co.uk (2023–2025): **neither broker number ever appears**. Hello Prima's historically published numbers were 020 3318 9745 (support/claims), 0333 999 0100 (Autoglass) and 0333 070 2684 (RAC).

Overall statement

As of 2 July 2026, **no public page or snippet was found showing 0330 088 1135 or 0161 826 1620 published in connection with Hello Prima / Prima car insurance** (verdict: not confirmed). What the evidence does establish — with screenshots — is that (a) both firms surface together for virtually all "Prima insurance" contact searches, (b) the broker's numbers are the only numbers a searcher sees, (c) AI answer systems have generated the wrong association on demand, and (d) at least one customer publicly reports phoning "a company called Prima" by mistake while seeking Hello Prima. This does not prove customers dial the broker's numbers; it documents the mechanism by which they plausibly would. Completed misdirected contact would need first-party evidence (call logs, recordings, misdirected correspondence).

Unverifiable lead (recorded honestly): a ceoemail.com page for "Prima Subsidiary Ltd" appeared in one result list for a 0161-number query but is bot-gated and not archived; it could not be inspected (NUM report, blockers).
